

Dear _____,

Thanks for the update and here are some layout ideas for your meeting with _____ on Monday.

If we have twelve 4 - 6 meter silos we could have them in groups of twos and threes suspended on 14 - 16 meter cables as in the following plan and images.

I selected mostly the "square" holes and numbers 1, 7 and 10 are suspended from the "round" holes (not quite sure what the difference is)

Looking forward to seeing you all here

Very best
