Iron garden

Iron garden

These elements will be produced in Brazil and shipped:

2400 – stainless steel rods – 100cm (H - approximately) x 4mm Ø

2400 – brass bells

Deciding whether to produce - Brazil or Netherland:

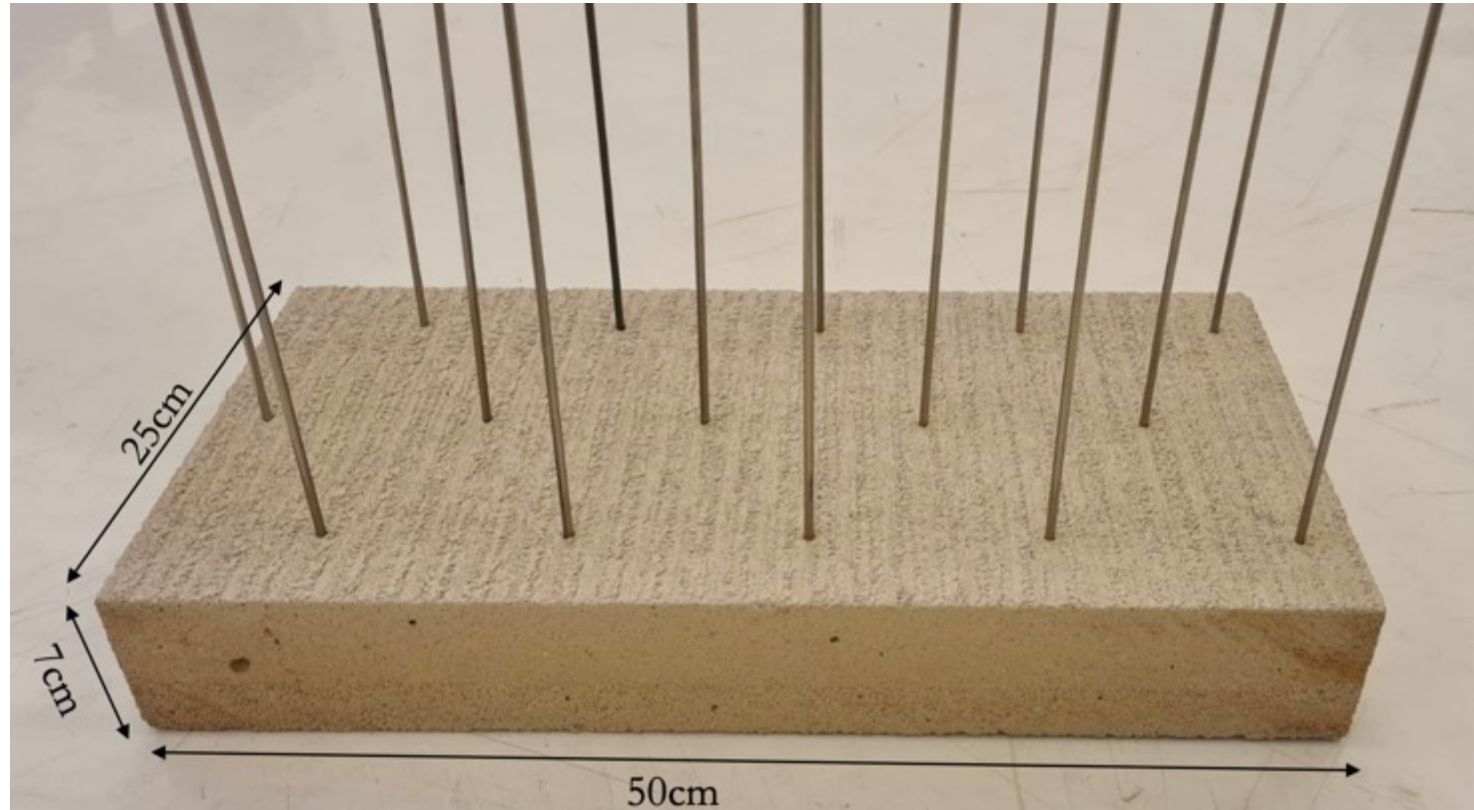

160 – cellular concrete blocks or concrete block – 50cm (W) x 50cm (L) x 6 or 7cm (H)

Iron garden

Instructions for producing/buying blocks:

- **160 Cellular concrete block or concrete block** with 50cm x 25cm and approximately 7cm high.

It will be necessary to drill 15 holes 4mm thick and 4cm deep for each block.

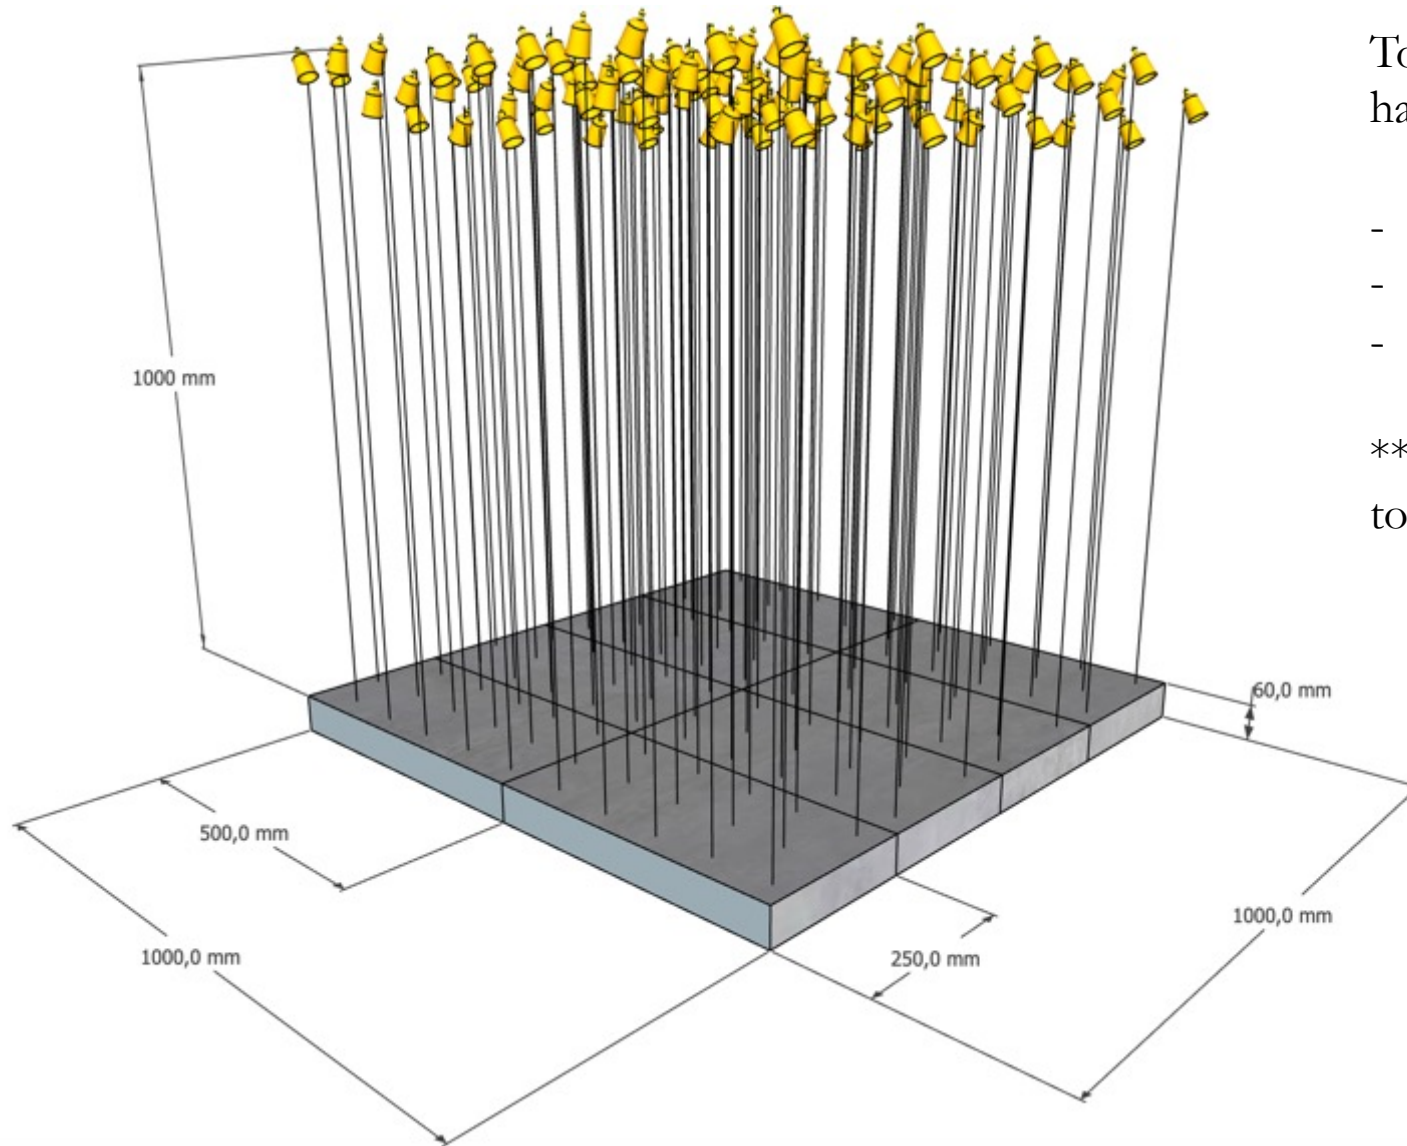

In case the best option is to produce in Netherlands, we will send 4 patterns with measurements of how the blocks should be drilled.

Pattern example

Iron garden

Assembly instructions:

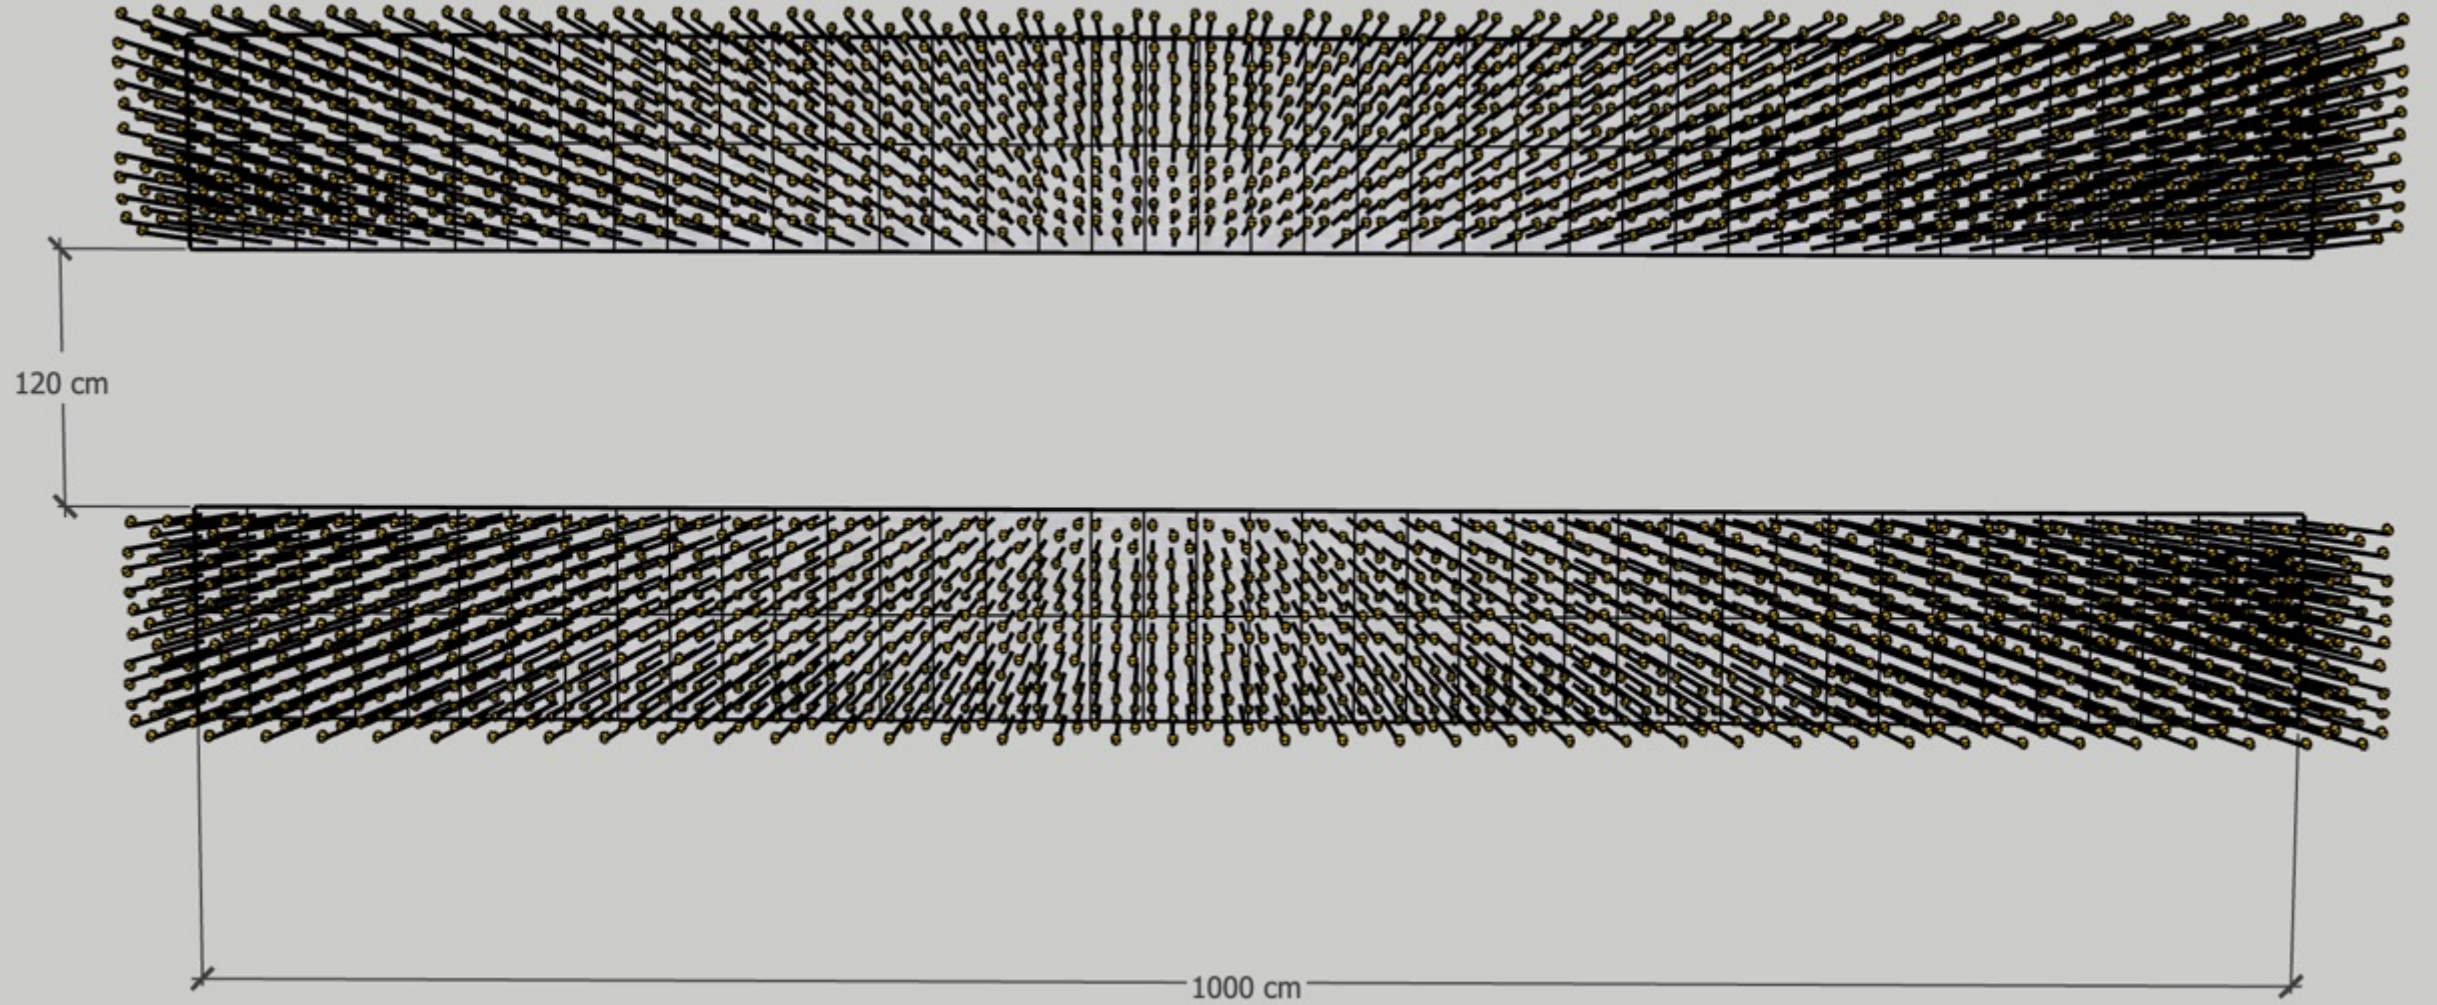

To assemble the work, it will be necessary two handlers for 3 days:

- Place the blocks (already drilled) in the space
- Install the bells on the stainless steel rods**
- Place the rods in the blocks

**Instructions on how the bells will be attached to the rods will be sent later.

Chandelier

Chandelier

Chandelier

Chandelier

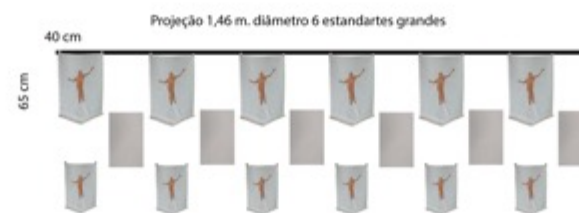

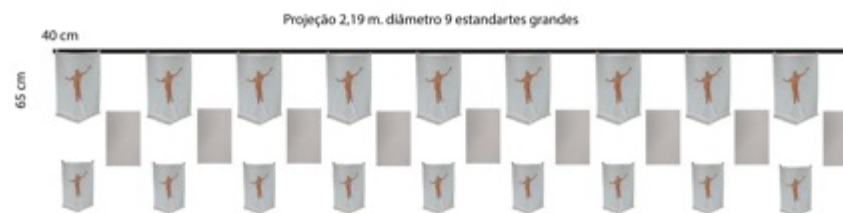

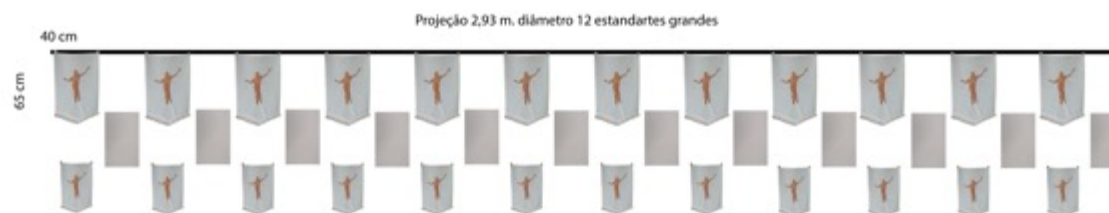

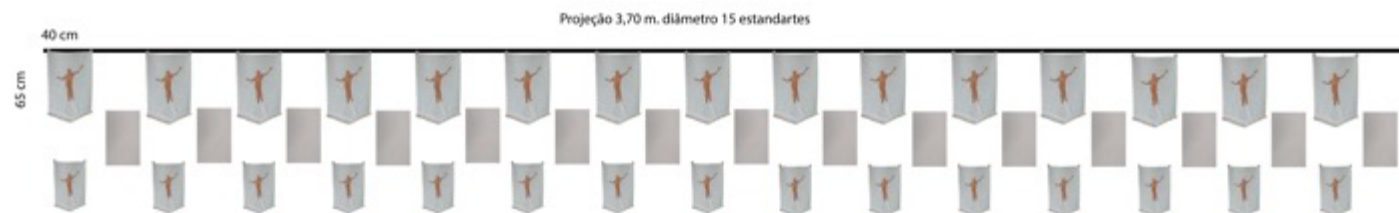

Chandelier

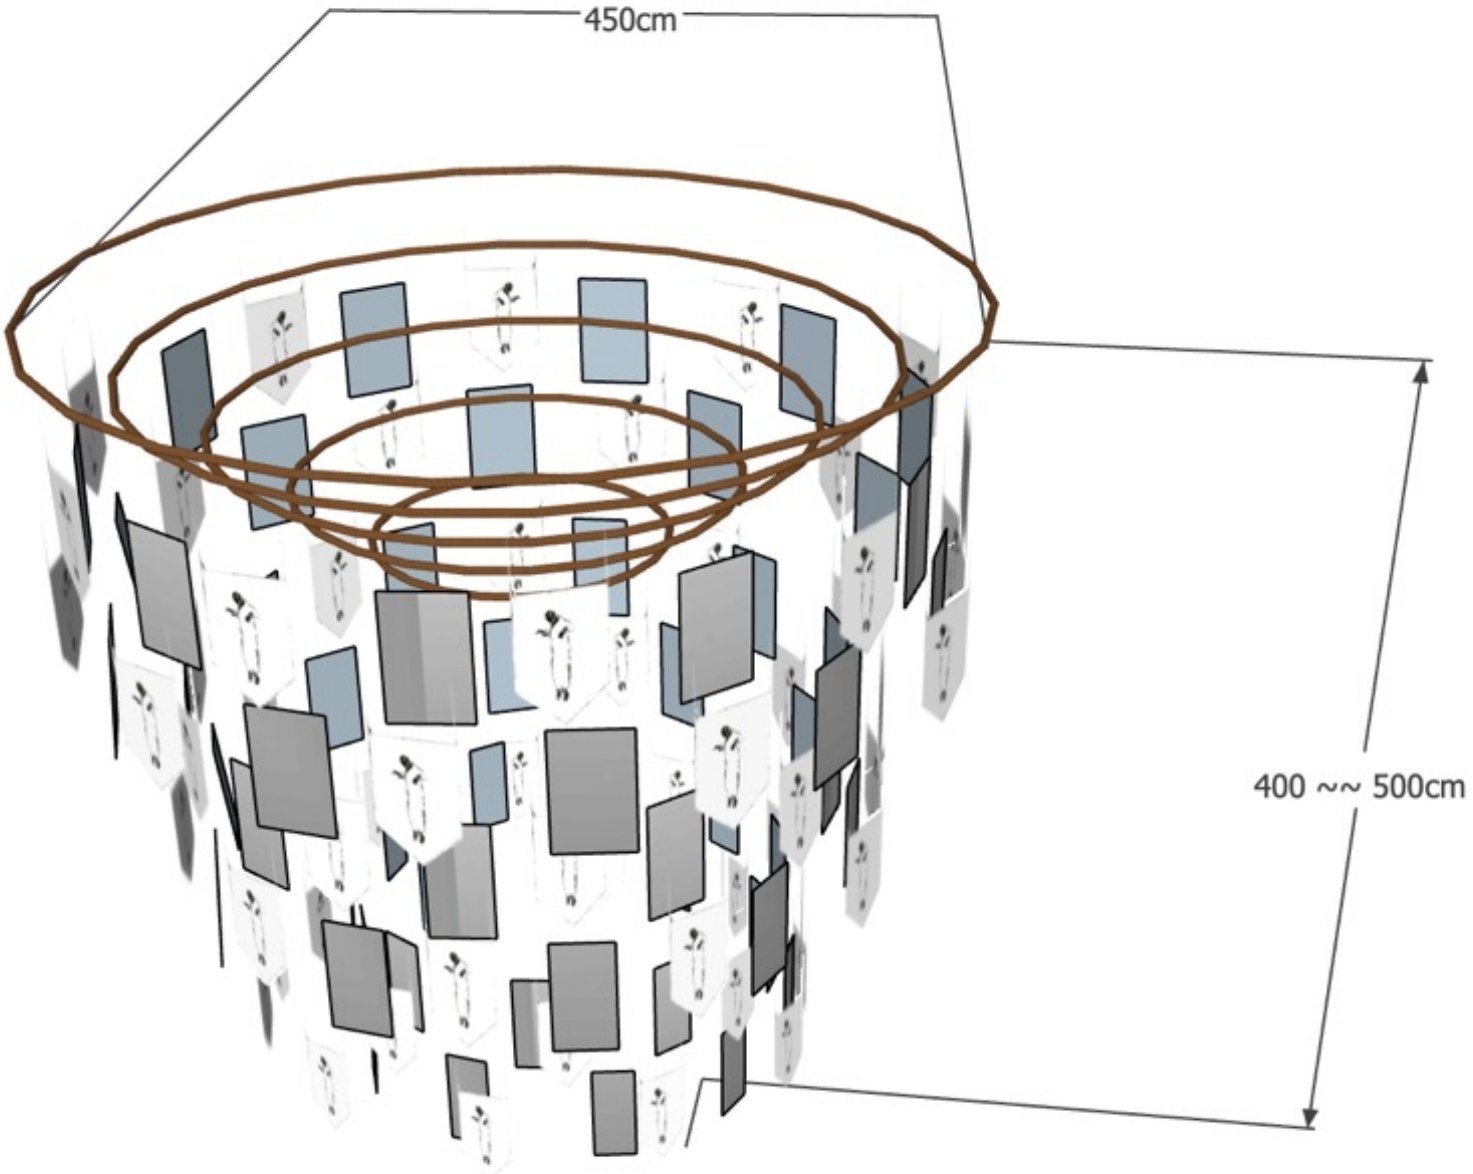

All the parts will be shipped from Brazil

Soon we will update the quantities of each element.

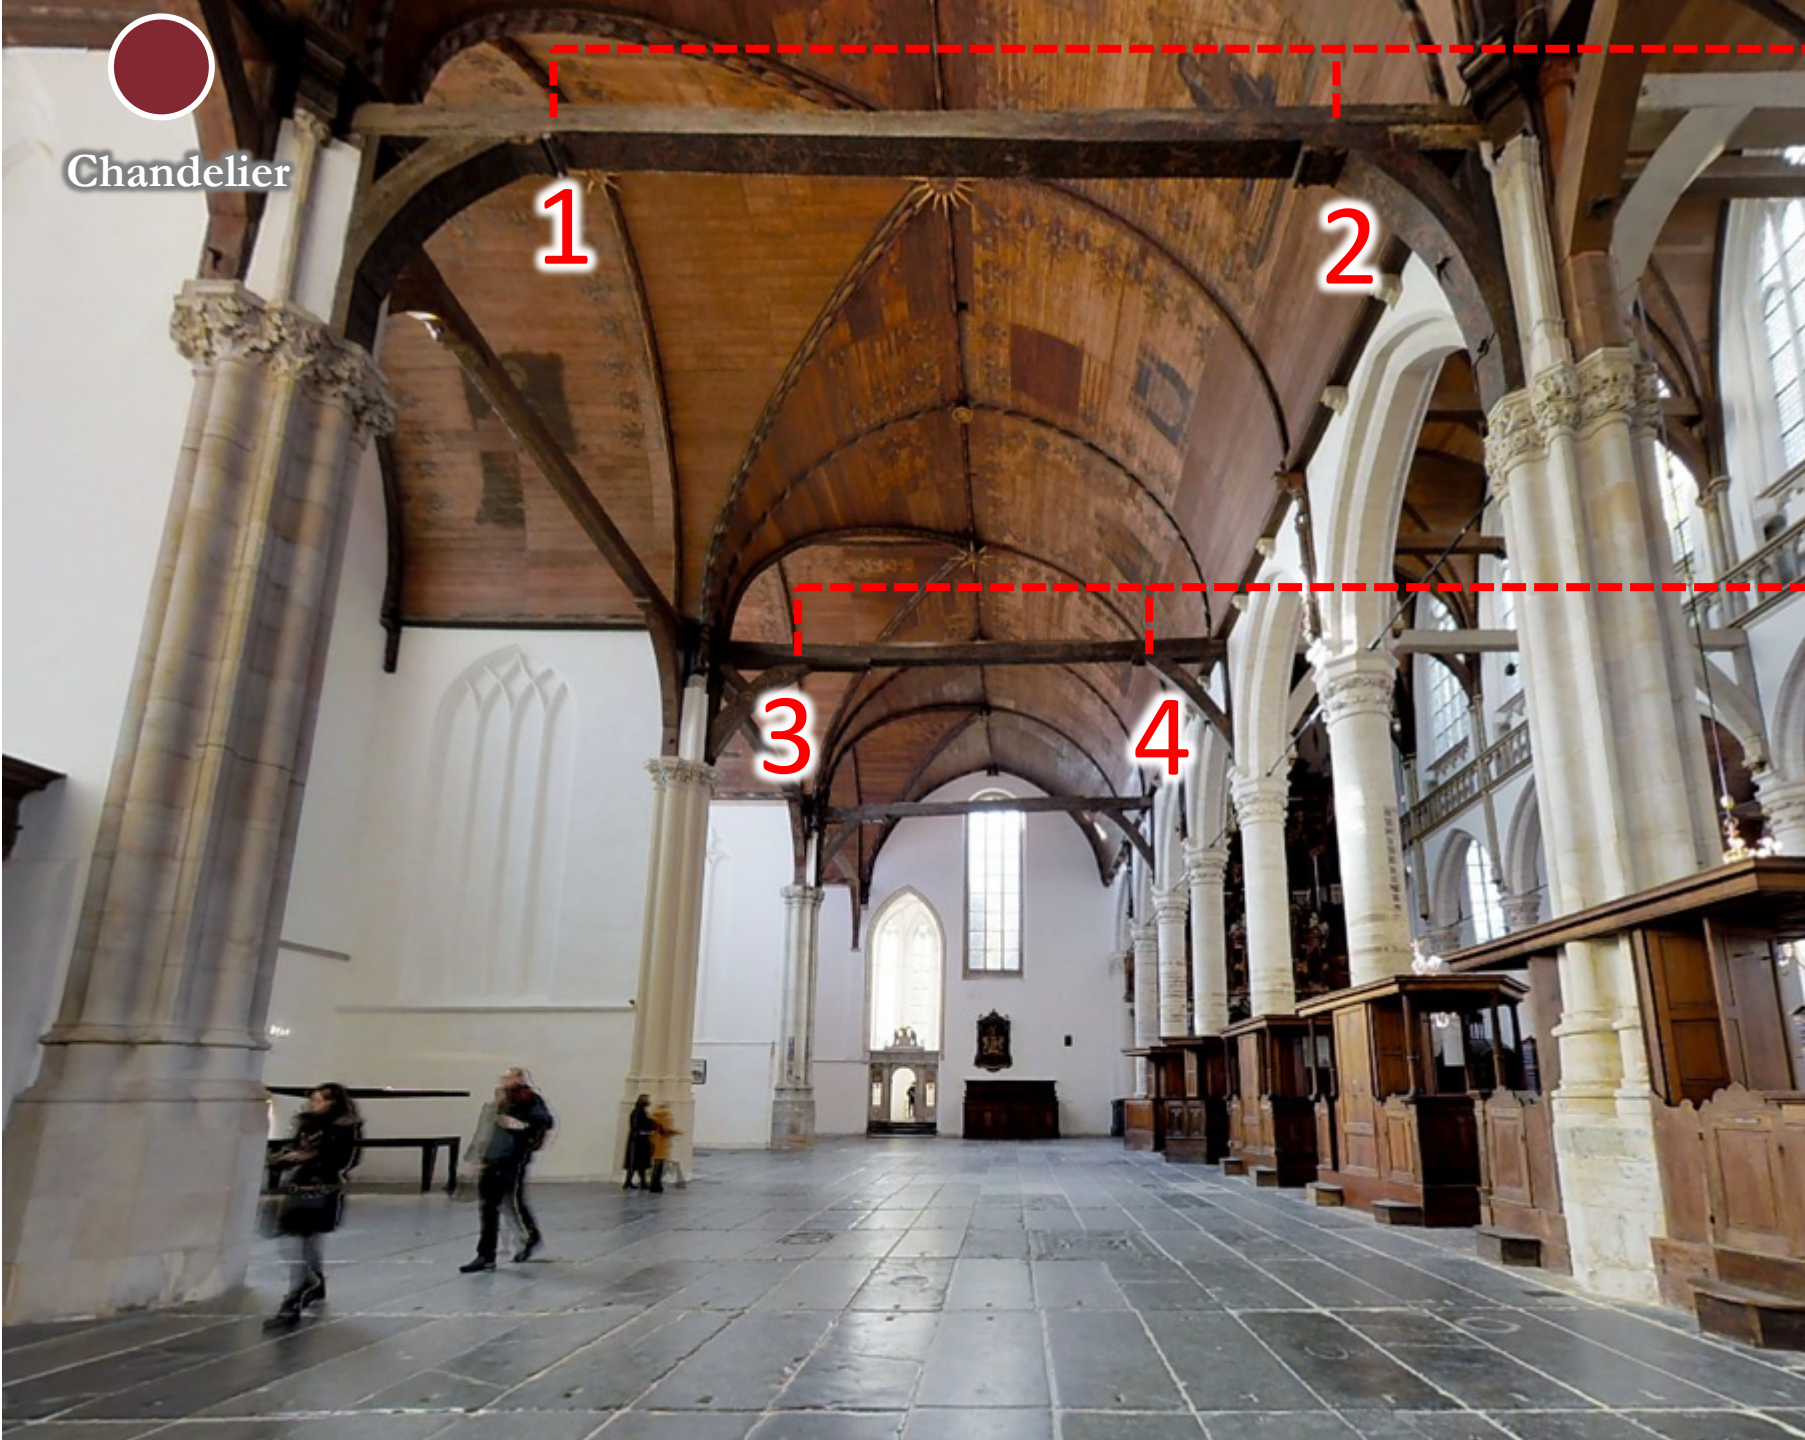

Chandelier

Estimated weight – 200kg's

Chandelier

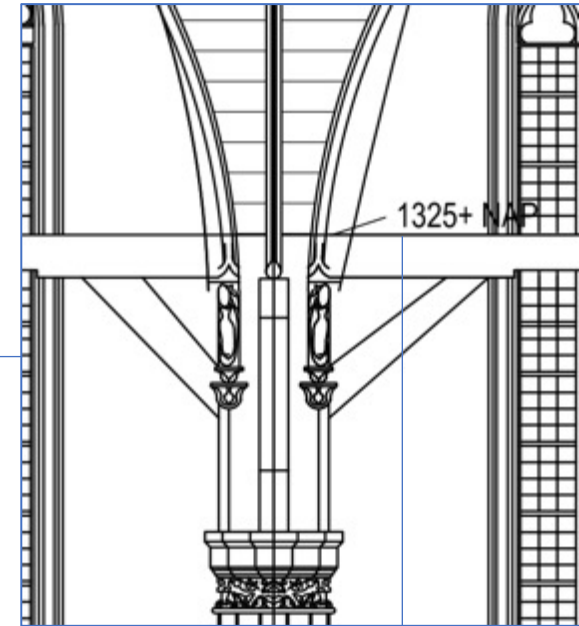

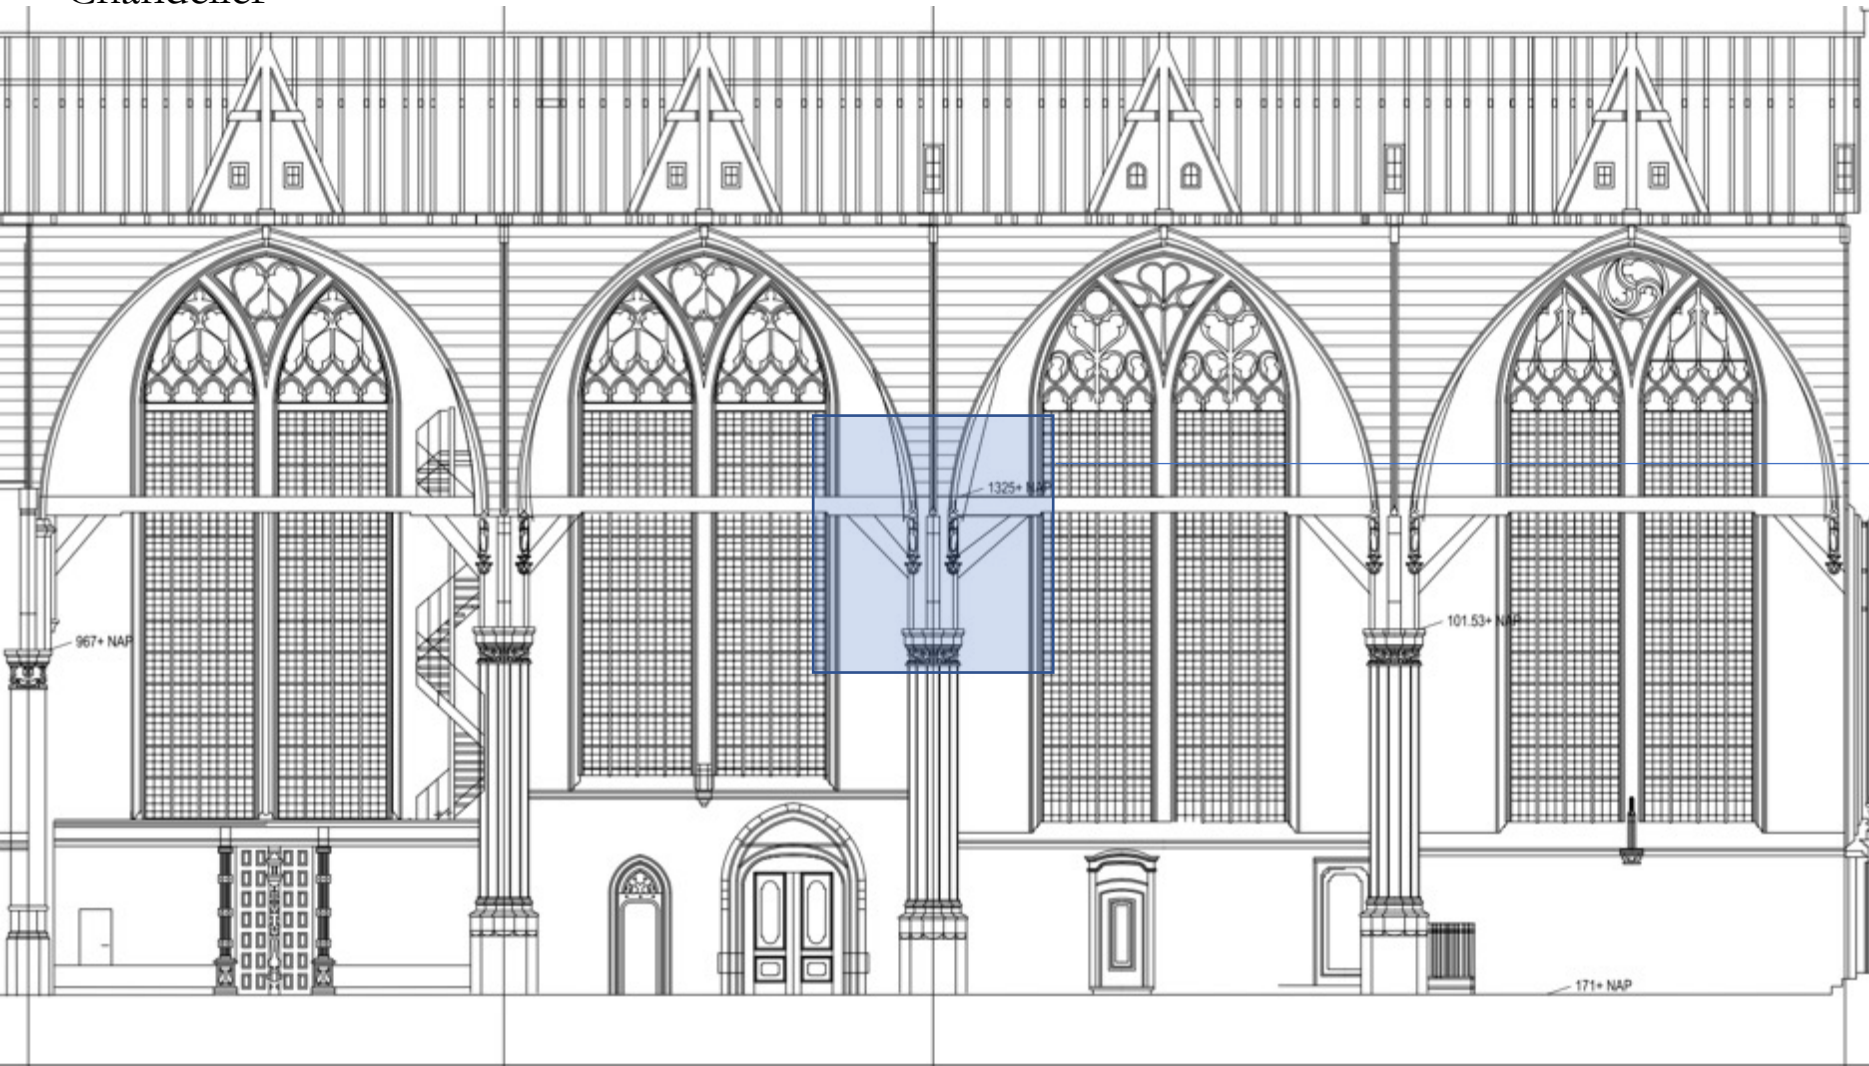

We are thinking of using these 4 points to hang the chandelier

- Could you please confirm if we can use these points and what is the exact height of them?
- Considering the piece's weight, each point needs to support at least 60kg's

Chandelier

Just to confirm, would this be the height of the wooden bars?

Chandelier

Clip for 3/16
Steel Cable

3/16" Steel Cable

Chandelier

Necessary equipments

Scissor lift with the necessary height to reach the hanging points

3/16" Steel Cable

Clip for 3/16 Steel Cable

5m high Dismountable scaffolding

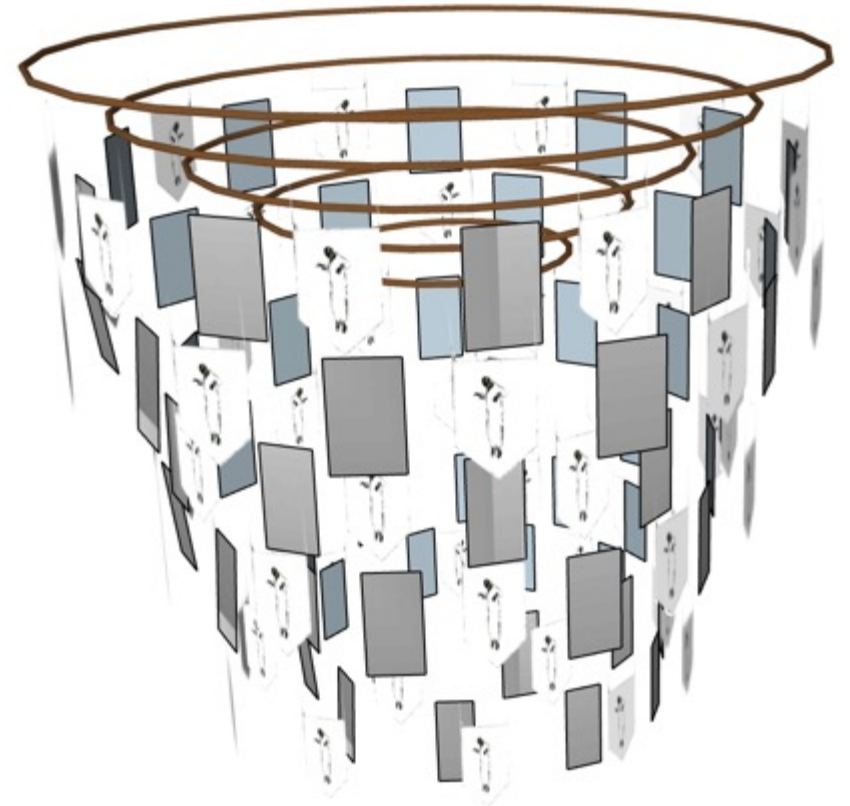

Chandelier

- To install

4 handlers – 1st day

2 handlers – 3 days

- Scaffolding will be used to support the big ring on the top during the assembly of the cables
- Further instructions will be sent as soon as the work is completed in Brazil

Antonio Obá, Malungo - rito para uma missa preta, 2016, charcoal, plaster sculpture, bottle of brazilian spirit, candles, chalice plated in gold and gold leaves

To be constructed on site

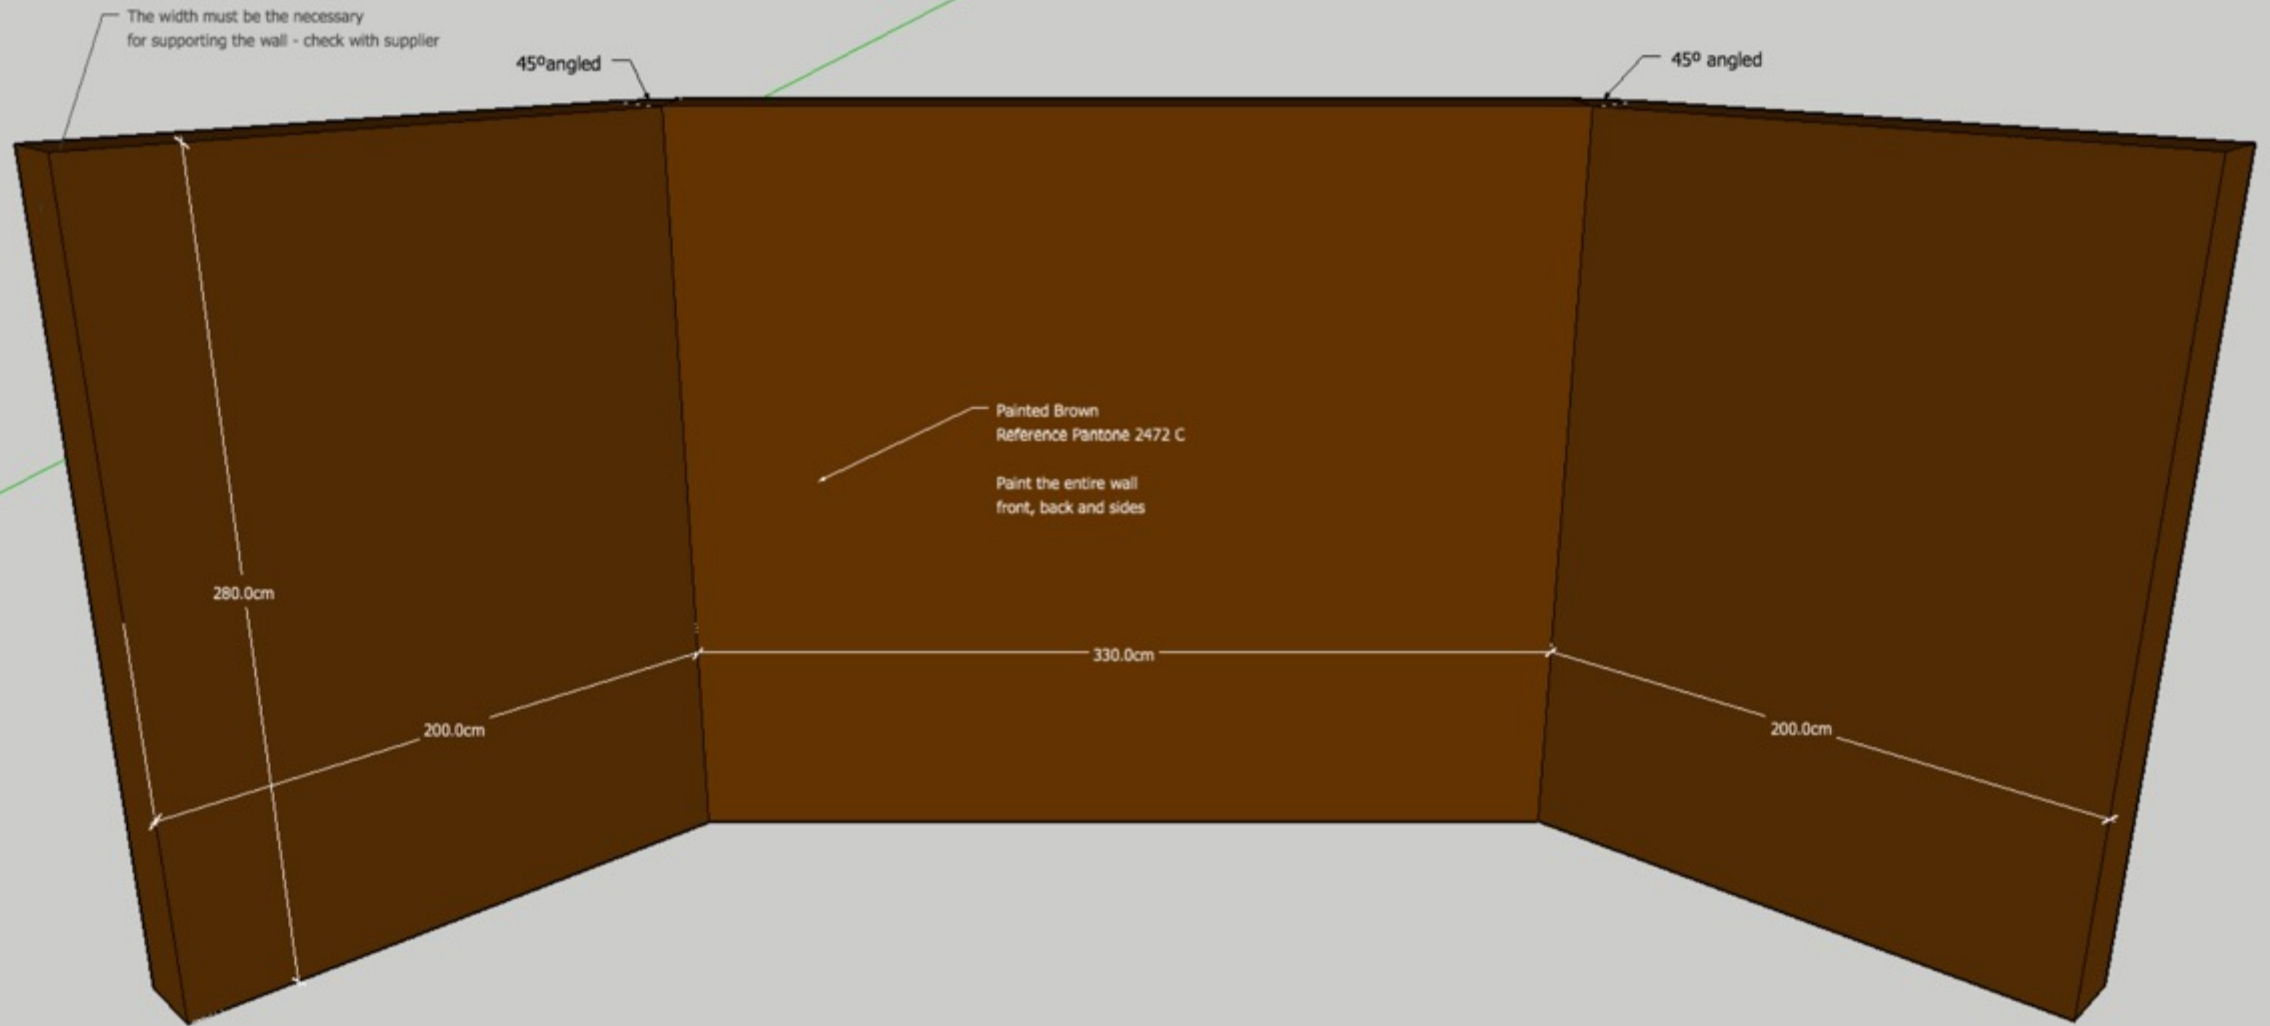

- Walls
- Gold leaf application
- 5 charcoal trays
- Buy charcoal

To be shipped

- 2 framed paintings
- Framed steel mirror
- Bottle of brazilian spirit
- Candles
- Chalice
- Metal pedestals
- Plaster sculptures to put with charcoal
- 2 extra paintings that will be included on the installation

Walls – to be constructed on site

Walls – to be constructed on site

Color reference for the walls to be painted

PANTONE 2472 C

PANTONE®
2472 C

Color values:

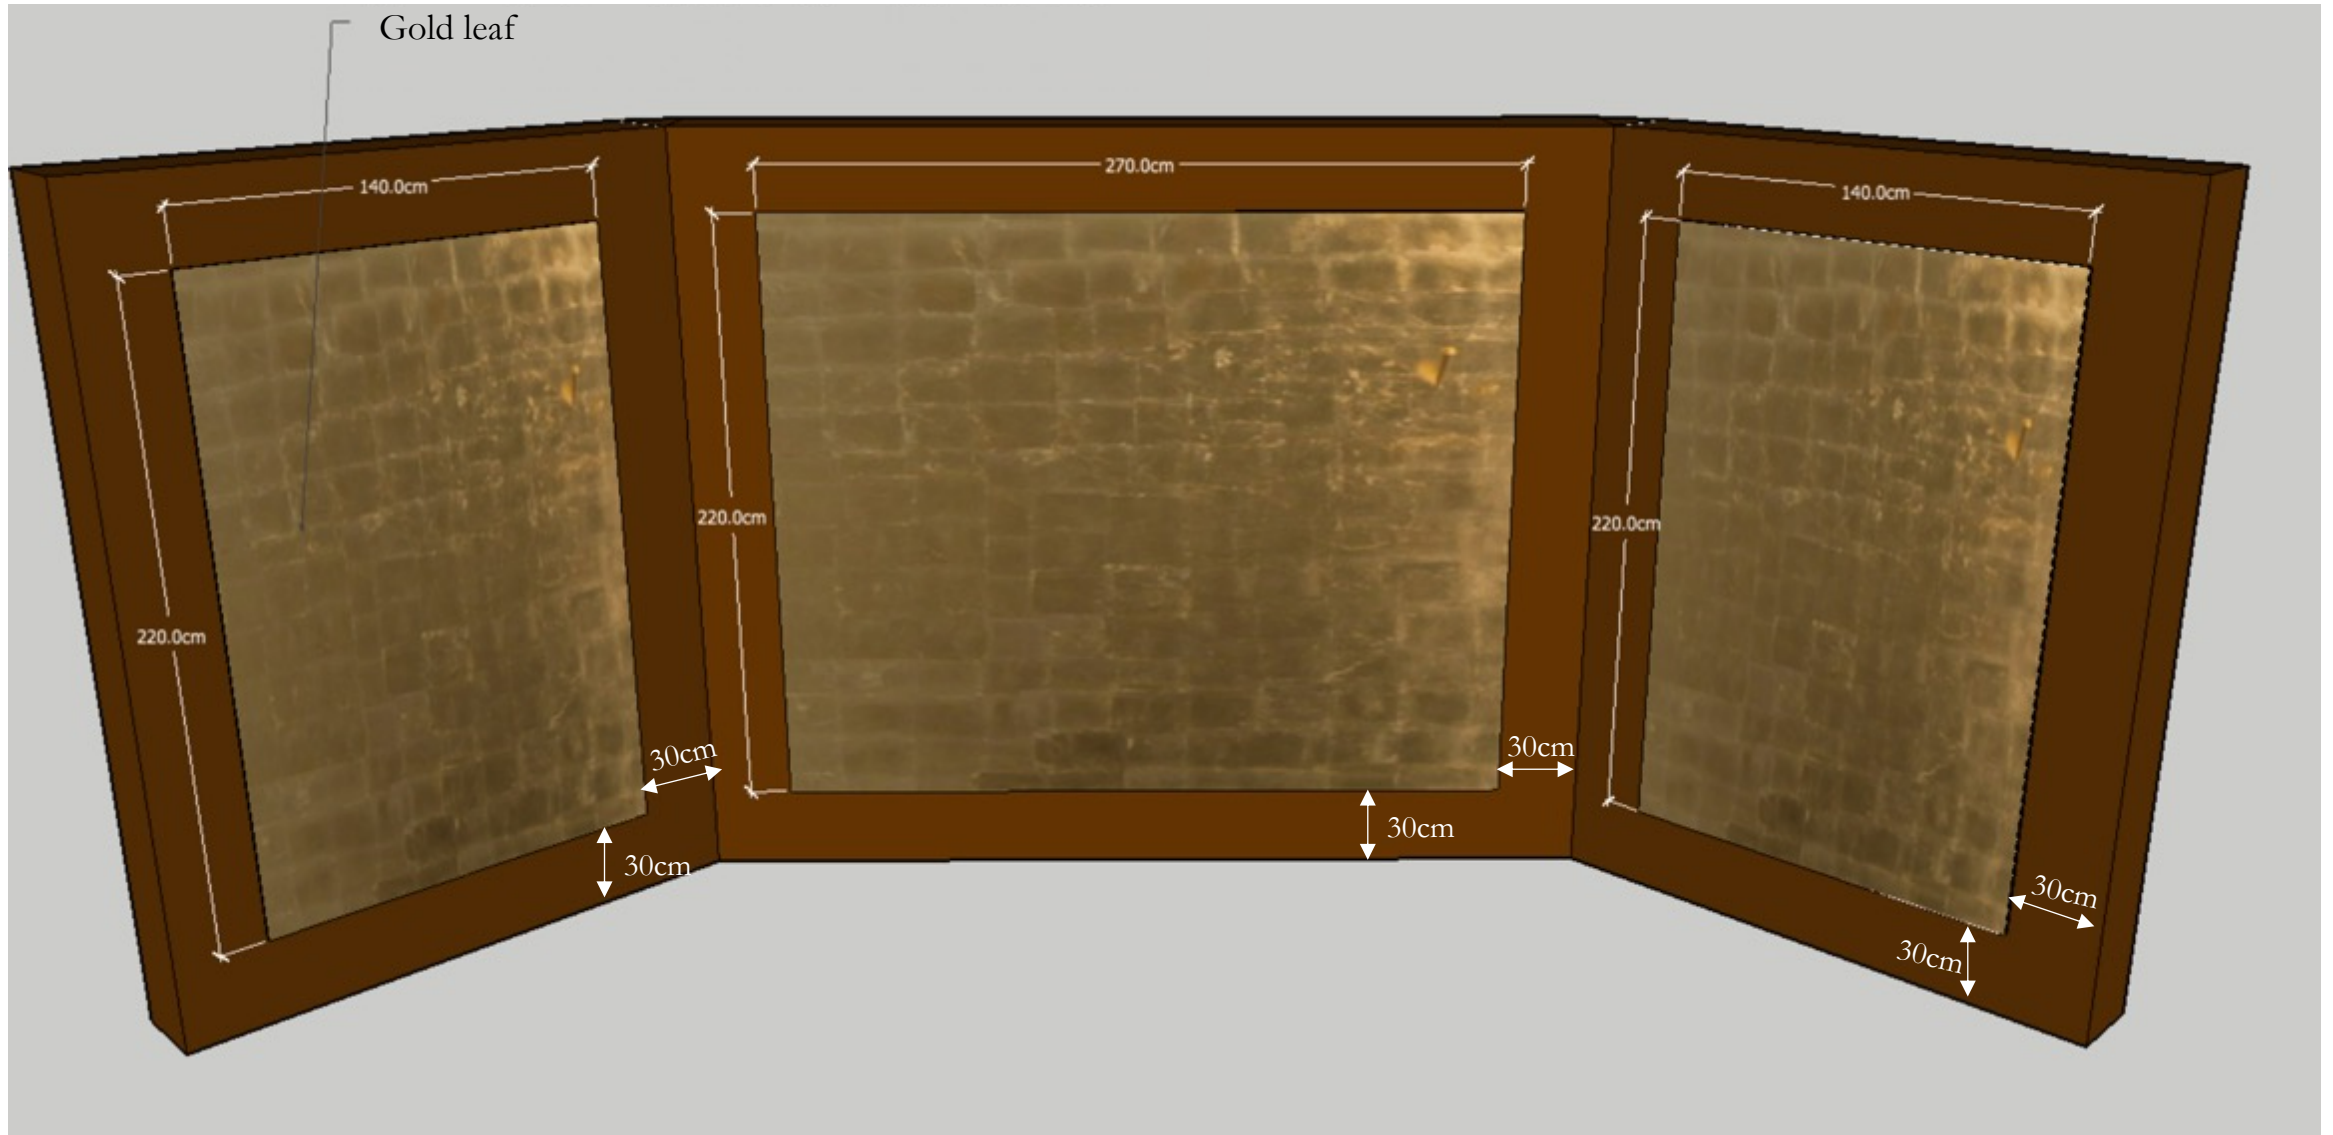

RGB	95 64 40
HEX/HTML	5F4028
CMYK	30 64 86 61

The back part of the structure must also be painted

Gold leaf

- Apply gold leaf following the measurements
- The sheets must be gold imitations, usually 14cm x 14cm (or a similar size)
- Need to hire someone with experience in gold leaf application

Gold leaf

Gold leaf

Gold leaf

Buy charcoal

500kgs of charcoal should be enough to fill all the trays.

It will depend on the size of each charcoal, in Brazil the pieces are about 10 to 20cm long by between 5 and 10cm in diameter.

appearance of Brazilian coal

example

Oba is producing two more extra paintings that will be part of Malungo installation. These paintings will be light (less than 10kgs) we would like to hang them on a wooden bar above (see next page), using fishing wire or nylon.

Hanging points

100lbs fishing wire
